Professional Summary

Second-year IT Engineering student at VCET building production-grade AI and full-stack systems. Hands-on experience integrating LLMs (Groq LLaMA 3.3 70B, Claude API) into agentic pipelines, RAG architectures, and anomaly detection engines. Participant in 6 hackathons. Seeking an AI/ML Engineering internship for 2026.

Technical Skills

AI / ML: LLM Integration (Groq, Claude API, Ollama), RAG Pipelines, LlamaIndex, ChromaDB, pgvector, Prompt Engineering, Agentic Workflows, Anomaly Detection

Languages: Python, JavaScript, TypeScript, C++, Java

Frontend: React 18, Vite, Tailwind CSS, Framer Motion, Recharts, D3.js

Backend & DB: Node.js, Express.js, Firebase (Auth + Firestore + Cloud Functions), MongoDB, MySQL

Tools: Git, GitHub, Vercel, Netlify, Razorpay, Docker (basic)

Projects

Sensei – Agentic AI Code Review Intelligence Platform — [GitHub](#) 2026

React, Node.js, Claude API, GitHub Webhooks, Agentic Loop Architecture

- Designed an agentic PR review system that passively captures GitHub PR data to build per-engineer “Review DNA” profiles, enabling context-aware, personalized code feedback at scale.
- Architected a self-improving agentic loop: Claude API handles 24/7 automated PR review with explainability layers, confidence scoring, and feedback incorporated back into the reviewer’s evolving profile.
- Built for Track 02 (Human–AI Collaboration) – core thesis is that AI augments engineer growth rather than replacing review judgment, using historical patterns to surface blind spots and recurring anti-patterns.

BookMyTurf – Sports Turf Booking SaaS Platform — [GitHub](#) — [Live](#) 2025 – Present

React 18, TypeScript, Vite, Tailwind CSS, Node.js, Express.js, Firebase, Razorpay

- Production-deployed multi-role SaaS for sports turf discovery and booking in the Mumbai region with real turf owners onboarded and live Razorpay payment processing.
- Implemented atomic slot-locking via Firestore transactions to prevent double-booking under concurrent requests; resolved Razorpay signature verification and Firebase Admin cold-start bugs in production.
- Built role-based owner dashboard with Recharts revenue analytics; showcased at national-level project expo and startup pitch.

RAG Portfolio – AI Engineering Projects 2025 – Present

LlamaIndex, ChromaDB, Ollama, Claude API, pgvector, Pinecone, Notion API, React

- Legal Doc Q&A Bot:** Semantic retrieval over legal corpora using LlamaIndex + pgvector + Claude API with context-aware chunking strategy.
- Internal Knowledge Base:** Notion API ingestion pipeline, Pinecone vector store, streaming React UI for low-latency responses.
- arxiv-oracle (WIP):** Research paper analyst using LlamaIndex + ChromaDB + Ollama for on-device embedding and multi-paper cross-referencing.

Education

B.Tech in Information Technology 2022 – 2026 (Expected)

Vidyavardhini College of Engineering and Technology (VCET), Vasai – Mumbai University

CGPA: **8.02 / 10.0**

Achievements

- VMPS Project Showcase Winner** – National-level college expo; presented BookMyTurf as a startup-ready platform to industry judges.
- 6 Hackathons** – Built end-to-end submissions across COHERENCE 2026, Recursion 7.0 (blockchain), InfraTech, MEGA-HACK 2026, HackerRank; domains: AI, blockchain, IoT, civic tech.
- DSA:** 200+ LeetCode — 150+ GFG – active daily practice via Striver’s A2Z course.
